Columbus, OH

Elisabeth H. Wiig, Ph.D., CCC-SLP
Knowledge Research Institute
Arlington, TX

1

PAYING ATTENTION

Analysis Questions?

1. Volume?
2. Do I get attention?
3. Do I reinforce good attending?
4. Do I speak too quickly?
5. Do I read with enthusiasm?
6. Do I stay on topic?
7. Do I control the noise level?
8. Do I check for attention?

Ideas - Strategies

1. Hearing?
2. Reinforce attending behavior
3. Provide units on listening, listening ears & activities
4. Modify patterns of intonation, rate
5. Emphasize key ideas and concepts
6. Be aware of abrupt changes in topic and meaning.

2

FOLLOWING DIRECTIONS

Analysis Questions?

1. Do I use familiar vocabulary?
2. Are my directions clear and simple?
3. Is he/she physically able to do task
4. Do I probe for trouble spots?
5. Do I check for comprehension?
6. Do I repeat-rephrase directions?
7. Do I check for processing order?
8. Do I limit the number of ideas in a sentence?
9. Do I write on the board what I've said?

Ideas - Strategies

1. Make commands relevant to the environment
2. Practice appropriate routines: (sharpening pencils, stacking books, etc.)
3. Use manipulatives, and practice in small increments
4. Make children say instruction in their own words
5. Use multiple colors, and underlining
6. Use folded papers, circling, and big print
7. Teach recognition of directional cues
8. Teach concepts of time and order
9. Model sequence in routines often

3

REMEMBERING THINGS

Analysis Questions?

1. Do I restate the question?
2. Are questions short and simple?
3. Do I allow for processing time?
4. Do I establish a frame of reference?
5. Do I elicit background knowledge?

Ideas - Strategies

1. Establish links between old and new information
2. Introduce choices with visual cues
3. Teach "I don't know" is acceptable sometimes
4. Provide listening guides (listening questions during lectures)
5. Provide keyword reminders
6. Use student conferences
7. Scaffold ideas, relate personal experience

4

UNDERSTANDING THINGS

Analysis Questions

1. Do I restate the question?
2. Are questions short and simple?
3. Do I allow for processing time?
4. Do I establish a frame of reference?
5. Do I elicit background knowledge?
6. Do I preview the topic in advance?
7. Do I explain purpose, expectations?
8. Do I assume children understand me?

Ideas - Strategies

1. Establish links between old and new information
2. Introduce choices by framing answers
3. Break down lessons to make them more manageable
4. Provide processing time
5. Ask questions in a different way
6. Use student conferences
7. Review key vocabulary
8. Use parallel questions to frame participation

5

ASKING FOR REPETITIONS

Analysis Questions

1. Do I speak loudly enough?
2. Do I get attention?
3. Do I speak too fast?
4. Do I switch topics without signaling?
1. Do I control the noise level?
2. Do I cue important concepts?
3. Do I vary my vocal presentation?
4. Do I watch the # of ideas presented?

Ideas - Strategies

1. Hearing?
2. Mark important concepts appropriately
3. Watch your rate! Are you Robin Williams or Mr. Rogers?
4. Propositional content and sentence length
5. Don't make bridging assumptions
6. Be pragmatic.. say you are changing topics
7. Be aware of abrupt changes in content
8. Clarify who, what, where, when, why, how

6

DEVELOPING WORD MEANINGS

Analysis Questions

1. Do I use familiar vocabulary?
2. Are my directions clear?
3. Do I establish a frame of reference?
4. Do I preteach vocabulary?
5. Do I elicit stored knowledge/schema?
6. Do I give examples & subtitles?
7. Do I teach a hierarchy of meanings?

Ideas - Strategies

1. Define key vocabulary in advance
2. Mark important concepts appropriately
3. Watch your rate! Are you Robin Williams or Mr. Rogers?
4. Propositional content and sentence length
5. Don't make bridging assumptions
6. Be pragmatic.. say you are changing topics
7. Be aware of abrupt changes in content
8. Clarify who, what, where, when, why, how

7

UNDERSTANDING (NEW) MAIN IDEAS

Analysis Questions?

1. Do I use familiar vocabulary?
2. Do I ask key concepts to be repeated?
3. Do I establish a frame of reference?
4. Do I teach the concept of "Main Idea?"
5. Do I provide multiple examples?

Ideas - Strategies

1. Use visual clues whenever possible
2. Use a process approach to discerning main ideas
3. "What is important?" - "Why are we doing this?"
4. "What are the supporting details?" (Chart them)
5. Distinguish fact from opinion
6. Use manipulatives to demonstrate key concepts
7. Use brainstorming groups to discuss new and main ideas

8

LOOKING - COMMUNICATING

Analysis Questions?

1. Do I provide opportunities to talk
2. Do I encourage social communication?
3. Do I model appropriate communication?
4. Do I teach good communication?

Ideas - Strategies

1. Provide units on listening, listening ears and activities
2. Videotape communication exercises
3. Provide modeling for effective communication
4. Discuss parameters of attention, listening, perspective taking

9

BODY LANGUAGE

Analysis Questions?

1. Do I talk about communication?
2. Is communication important?
3. Do I monitor my nonverbals?
4. Do I give feedback on nonverbals?

Ideas - Strategies

1. Teach units on body language
2. Take pictures and discuss various expressions, moods, etc.
3. Talk about communicating in various ways.
4. Talk, discuss, model, demonstrate, play communication games

10

ANSWERING QUESTIONS

Analysis Questions

1. Do I restate the question?
2. Is the question short and clear?
3. What are my expectations?
4. Do I allow sufficient time?
5. What kinds of questions do I ask?
6. Do I establish a frame of referenc
7. Do I introduce choices?
8. Do I restrict questions in any way?
9. How do I respond to questions?

Ideas - Strategies

1. Practice simple (noncomplex) responses)
2. Use visuals so students can point to answers
3. Teach "I don't know" for some answers
4. Provide listening guides, organizers, key questions
5. Provide study guides
6. Repeat, rephrase, simplify
7. Prompt for prior knowledge
8. Present choices - concentrate on participation not correctness
9. Review types and purposes for questions
10. Model - demonstrate proper responding

11

RESPONDING IN TIME

Analysis Questions?

1. Do I provide enough time?
2. What are my expectations?
3. Type of questions posed?
4. Do I provide adaptations?
5. Do I introduce choices?
6. Do I facilitate, prompt, cue?

Ideas - Strategies

1. Ground responding in well-practiced routines
2. Use parallel questioning to facilitate prompt responding
3. Allow students to respond in teams.. help each other.
4. Rephrase, restructure (participation is key)
5. Any fast response is better than no response
6. Use a hierarchy of questioning strategies.
7. Script responses that can be made

12

ASKING FOR HELP

Analysis Questions?

1. What are my expectations?
2. Do I model questions to ask?
3. Do I show how to get help?
4. Do I allow sufficient time?
5. Do I provide practice?

Ideas - Strategies

1. Practice simple (noncomplex) responses
2. Providing what I need to know charts
3. Teach "I don't know" for some answers
4. Provide listening guides, organizers
5. Provide a Problem - Question Checklist
6. Assign a peer helper
7. Review types and purposes for questions
8. Model - demonstrate proper responding

13

ASKING QUESTIONS

Analysis Questions?

1. Do I encourage questions?
2. Have I modeled questions to ask?
3. Do I respond positively to questions?
4. Is my classroom a safe place?
5. Do I build on students' questions?

Ideas - Strategies

1. Play practical question games, Clue, 20 questions?
2. Teach specific lessons on "how to find out!"
3. Use student groups to improvise discussion questions
4. Provide what I need to know charts with questions shown
5. Teach the meaning of "being wrong" and importance of errors
6. Teach requests, e.g., clarification, help, action, information

14

USING A VARIETY OF WORDS

Analysis Questions

1. Do I introduce new vocabulary?
2. Do I use background knowledge?
3. Opportunities to expand vocabulary?
4. Do I teach basic concepts?
5. Do I facilitate vocabulary growth?
6. Do I make words interesting?
7. Do I provide "what-if" situations
8. Are vocabulary needs known?

Ideas - Strategies

1. Provide common objects for manipulation.
2. Do word webbing - networking activities.
3. Use word categories and categorization tasks
4. Use manipulatives to teach basic concepts
5. Write story impressions with key words
6. Use sorting and matching vocabulary games
7. Use flowcharting, theme-building
8. Teach alternative vocabulary through brainstorming activities

15

FINDING THE RIGHT WORD TO SAY

Analysis Questions?

1. Do I use facilitating prompts?
2. Do I provide retrieval strategies?
3. What are my expectations?
4. Do I teach the concept of restating?

Ideas - Strategies

1. Teach retrieval skills, association, visualization, rehearsal
2. Word webbing, semantic organizers, network builders
3. Talk about words and provide choices
4. Use visuals, objects, etc.
5. Identify key concepts in stories
6. Use flowcharting to organize concepts and ideas

16

SAYING THOUGHTS

Analysis Questions?

1. What are my expectations?
2. Do I encourage clarification?
3. Am I appropriately responsive?
4. Are we focused on the here and now?
5. Do I teach the concept of restating?
6. Do I provide sufficient time?

Ideas - Strategies

1. Participation is key
2. Model and prompt for even partial participation
3. Use story starters, plays, and conversations
4. Use process questioning to chain responses
5. Foster participation in familiar routines
6. Language experiences on high interest topics - dinosaurs

17

DESCRIBING THINGS

Analysis Questions

1. What are my expectations?
2. Do I encourage elaboration?
3. Am I appropriately responsive?
4. Are we focused on the here and now?
1. Do I teach the concept of restating?
2. Do I provide sufficient time?
3. Do I teaching organizing & clarifying?
4. Do I use routines to foster description?

Ideas - Strategies

1. Remember: Participation is key
2. Verbal changes, object description
3. Use story starters, plays, and conversations
4. Use process questioning to chain responses - 20 questions
5. Foster participation in familiar routines
6. High interest vs. low interest topics - dinosaurs vs. new content
7. Verbal games, video taping, modeling, working in teams
8. Read - Say - Write

18

STAYING ON TOPIC

Analysis Questions

1. Do I encourage communication?
2. What are my expectations for topics?
3. Who establishes the topics?
4. Are topics teacher or child centered?
5. Do students work together or alone?
6. How do I facilitate topic maintenance?
7. Awareness of pragmatics?

Ideas - Strategies

1. Provide planned time for discussion and conversation
2. Establish working discussion groups
3. Provide topics that are familiar and within vocabulary abilities
4. Provide adequate response time
5. Allow students work in pairs and explain topics together
6. Use turnabouts, attention focusing
7. Use description, problem solving, enacting scenarios, or routines

19

GETTING TO THE POINT

Analysis Questions?

1. What are my expectations?
2. Do I provide sufficient time?
3. Do I facilitate correct responding?

Ideas - Strategies

1. Set boundaries for discussion
2. Provide cues to limit content
3. Use guided questioning to focus attention
4. Use frequent reminders of topic

20

PUTTING EVENTS IN ORDER

Analysis Questions?

1. Do I encourage conversation?
2. What are the communication rules?
3. Do I model proper order?
4. Do I teach order-based concepts?
5. Are my expectations reasonable?

Ideas - Strategies

1. Model and demonstrate proper sequencing
2. Allow students to work in pairs
3. Use a variety of curriculum-base sequencing activities
4. Segment stories and reconstruct or retell
5. Use guided questioning, story flowcharting
6. Graphically illustrate order in communication

21

POOR GRAMMAR

Analysis Questions?

Do I model appropriate grammar?

Ideas - Strategies

During instruction, model correct utterances

COMPLETE SENTENCES

Analysis Questions?

Do I redirect incorrect responses?

Ideas - Strategies

New forms - old functions

SHORT SENTENCES

Analysis Questions?

Do I focus on structure in old meaning?

Ideas - Strategies

Use high interest familiar content to model grammar

22

EXPANDING ANSWERS

Analysis Questions?

1. Do I encourage full communication?
2. Teacher or child centered?

Ideas - Strategies

1. Various grammatical programs available
2. Focus on meaning making first
3. Use of strength areas
4. Communication activities requiring elaboration
5. Barrier activities requiring greater specificity
6. Verbal matching exercises
7. Use cooperative groups to encourage greater elaboration
8. Use description, problem solving, enacting scenarios, or routines

HAVING A CONVERSATION

Analysis Questions?

Do I encourage communication?

Ideas - Strategies

Use discussion groups for all purposes.

23

TALKING IN A GROUP

Analysis Questions?

1. Do I facilitate interaction?
2. How do use communication?
3. What kind of classroom do I have?
4. Do I use communication to teach?
5. Physical Arrangements of my class?

Ideas - Strategies

1. Set high communicative expectations
2. Language is synergistic meaning making in communication
3. Design activities to create interaction, physical first
4. Teach meaning, problem solving, analysis and synthesis in groups
5. Organize the physical space to facilitate interaction
6. Provide planned sharing and discussion times
7. Cooperative learning, dialogue groups, editing, formulating

24

SAYING THINGS DIFFERENTLY

Analysis Questions?

Do I encourage alternative answers?

Ideas - Strategies

Model a variety of responses to questions

GETTING UPSET

Analysis Questions?

1. How to I handle student responses?
2. Do I reward innovation and difference?

Ideas - Strategies

1. Ask for different answers
2. Encourage group support and different vocabulary choices.
3. Provide support for any level of participation

25

50 Classroom Pointers Teachers & Clinicians Should Follow

Wayne A. Secord, Ph.D., CCC-SLP
The Ohio State University

Elisabeth H. Wiig, Ph.D., CCC-SLP
Knowledge Research Institute

26

50 Classroom Pointers Teachers & Clinicians Should Follow

1. Make language more visible... act it out.
2. Encourage participation, e.g., yes/no, repetitions, choosing an answer, short phrases.
3. Rephrase directions... make students say things different ways, "Put your finger on," becomes "Touch the."
4. Provide frequent feedback for verbalizations.
5. Accept different levels of verbal responses ... remember, participation is key.
6. Change your voice while talking.
7. Review vocabulary before a lesson.... engage often in preteaching. Recognize the difference between proactive and reactive instruction.
8. Repeat instructions and check with students often.
9. Keep directions simple and short, use a slower rate of presentation.
10. Use frequent cuing techniques including, modeling the response first, providing a key word, carrier phrase, first sound, etc.

27

11. Ground language in routines, act them out, practice them, use as scaffolds.
12. Make frequent checks for comprehension. Don't assume anything with regard to understanding.
13. Use word webs, story organizers, vocabulary classification to build word knowledge.
14. Always elicit stored knowledge and schema... remember the story about dinosaurs.
15. Always state when the topic is changing. Children are entrenched in routines and avoid interruptions to their habits and thoughts.
16. Use explicit transition comments when discussing multiple ideas.
17. Teach students to listen for specific bits of information to signal changes in rules, procedures, routines. Agree on these ahead of time.
18. Post and review class rules, schedules, assignments, procedures, routines, etc. Use picture symbols as well as written language.
19. Make children say the instructions in their own words.
20. Follow Ellen's teachable moment theory. Don't pass up an opportunity.

28

21. Remember the itsy-bitsy principle. Keep things small. You can do it. It comes naturally after a while.
22. Teach time management and organization. Use calendars, written time schedules, and other reminders.
23. Preview the topic of discussion or reading with focal questions that will be discussed later. Prime the pump.
24. Teach students to wait when there are multiple questions, wait, present choices, use scaffolding.
25. Take your time. All students have some special needs and require individualized instruction.
26. Examine your realistic expectations. Stop teaching to the mean.
27. Foster a sense of competence... children need to know that mistakes are learning tools. That's why we have scrapbooks.
28. Limit the number of ideas in a sentence.
29. Review daily routines often and make the implicit ... explicit
30. Use small groups for all types of activities, problem solving, discussion, brainstorming -

29

31. Have one child provide choices for another.
32. Give adequate time for responding.
33. Use as many visuals as possible... all amplification devices you can, oversize print and multiple colors.
34. Encourage children to establish their own expectations for behavior, learning, etc., with your guidance.
35. Encourage verbal interaction between students. Language is meaning making for communication.
36. Minimize visual and auditory distractions.
37. Create a physical environment that facilitates classroom communication.
38. Provide ongoing and consistent feedback... yesterday, today and tomorrow.
39. Breakdown lessons to make them seem more manageable.
40. Allow students to wrestle with complex concepts out loud. They become more manageable then.

30

41. Expand on sentences using correct structure.
42. Provide bridges to past and present experience.
43. Frame responses so everyone participates
44. Brainstorm ideas before giving assignments.
45. Praise students for small accomplishments.
46. Encourage self-evaluation, self-monitoring, and review often.
47. Tell students the what and why of assignments in advance.
48. Let children do most of the talking. Use routines to help with this.
49. Teach children how to make requests especially for requests for help.
50. Use guided and parallel questioning strategies.

31

50 Classroom Pointers Teachers & Clinicians Should Follow

Wayne A. Secord, Ph.D., CCC-SLP
The Ohio State University

Elisabeth H. Wiig, Ph.D., CCC-SLP
Knowledge Research Institute

32
